

Salsify PXM Advance Catalog Sites

Securely share always-up-to-date product information with dynamic digital catalogs to help stakeholders self-serve information more quickly and efficiently.

Salsify Catalog Sites helps you quickly and easily create always-up-to-date product catalogs for your entire ecosystem of stakeholders. Catalog Sites are powered by your central source of truth PIM in the Salsify PXM platform, allowing you to securely share read-only access to the latest product content and rich media with your sales teams and customers faster, so you can spend less time searching for information and more time in-market.

- ✓ **Get to market faster**
- ✓ **Keep teams up-to-date**
- ✓ **Securely share content**
- ✓ **Enable omnichannel selling**
- ✓ **Create custom, branded product experiences without IT resources**
- ✓ **Less time searching, more time selling**

Catalog views

Create engaging, on-brand, and always-up-to-date digital product catalogs in an intuitive, easy-to-use interface built with business users in mind to quickly and securely share product information with all your stakeholders.

Improve Efficiency, Drive Growth, Win on the Digital Shelf

On-brand Product Experiences

Customize your Catalog Sites with your own brand look and feel. Create more curated visitor experiences through features such as product groupings, variant displays, and multi-language support.

Easy Visitor Interface

Engaging product discovery options and search & filter capabilities enable viewers to quickly and easily find the exact information they're looking for, including the ability to transform assets in bulk and export information into preset templates.

User-Friendly Self-Service

Catalog Sites' intuitive, easy-to-use interface was built with business users in mind, so they can create and manage engaging, on-brand, and always-up-to-date product catalogs without ever writing a line of code.

Share On Your Own Terms

Share data only when it's ready, and use preview and publish guardrails to choose what content you make available when. Password-less authentication for catalog viewers offer an extra layer of security.

Ensure Content is Always Up-To-Date

Catalog Sites is powered directly from your central source of truth PIM in the Salsify PXM platform, so any approved-for-publish updates are automatically reflected in your Catalog Sites, ensuring 100% data freshness with zero additional maintenance work.

With digital catalogs, Rawlings sales reps now have a much easier way to grab images and send them over to customers. More and more customers are getting the images themselves, freeing up the sales reps' time.
